Nine Layers Of Strength

The Composite Sandwich of Awesomeness

Let's think of a fiberglass pool shell as a huge sandwich. A sandwich is a composite, which basically means it's made up of different materials. Each material is applied in layers with the goal of giving the entire sandwich maximum flavor.

Such is the case with a fiberglass pool, which is also a composite. It's manufactured in multiple layers with each layer serving to maximize the strength and durability of the entire structure. In other words, our fiberglass pool is thought of as a sandwich of strength. Hence, we affectionately refer to our unique manufacturing methodology as our **Composite Sandwich of Awesomeness**. Here's what we put in it:

1. Gel coat.
2. 100% vinyl ester barrier coat.
3. First application of chopped fiberglass.
4. Second application of chopped fiberglass.
5. Hand-laid woven roving fiberglass.
6. Third application of chopped fiberglass.
7. Honeycomb core.
8. Fourth application of chopped fiberglass.
9. Fifth application of chopped fiberglass.
